edge banders, sizing edge banders

easy cart

It allows the management of both **cleaning and maintenance operations** of glue pots in a completely user friendly and safe manner. It guarantees the **preservation** of the PUR glue

AVAILABLE FOR THE WHOLE RANGE OF EDGE BANDERS

Easy cart is suitable for all glue pots available in the range, SGP-E, SGP, HGP. Completely independent from the edge bander, it can be installed in any position and easily moved where necessary. It only requires compressed air and power supply, without the use of inert gas (nitrogen) or other chemical products.

72 HOURS OF POLIURETHANE GLUE PRESERVATION

The innovative system of air management inside the tank, by means of the control software, allows the correct maintenance of the PUR glue, up to a period of at least 72* hours.

*Test performed with different PUR glues available on the market

GLUE POT INTEGRATED PREHEATING

The exclusive SCM system allows the simultaneous preheating of 2 glue pots with PUR glue, directly inside the tank. In this way the glue pots are immediately ready for use.

MOTORIZED AND POWERED EXTERNAL STATION

The external mounting station can accommodate a single glue pot, both motorized and powered, it allows for easy management of all cleaning, maintenance, unloading, as well as glue change operations.

EASY AND INTUITIVE USE

Thanks to the large "Touch Panel" control screen, all the operating modes of the new easy cart can be managed and monitored on a single screen. The independent electronic thermoregulation of up to 3 glue pots allows the change of processing in just a few minutes.
