

# Smartedge

**AVOIDING PRODUCTION BOTTLENECKS BY CHANGING THE WAY YOU APPROACH EDGE COATING IS NOW POSSIBLE THANKS TO OUR PATENTED EDGE&GO HEAD FOR VACUUM APPLICATION TECHNOLOGY.**

Until now, disassembling the application head was a time-consuming operation, re-aligning the components to the next edge shape or size, which could be straight, convex or concave, was even longer. Edge&Go enables continuous processing of different edges. Built into Smartedge, our solution for painting and sanding straight and shaped panel edges, this patented device significantly increases productivity, maintaining the coating quality edge after edge.

OUR PATENTED EDGE&GO VACUUM TECHNOLOGY ENSURES CUSTOMERS CAN QUICKLY ACQUIRE THE PRODUCTION FLEXIBILITY AND QUALITY THEY NEED, WHATEVER THE SHAPE OF THE EDGE.

## WHO WILL BENEFIT

Sub-contractors, furniture manufacturers

## MATERIALS PROCESSED

Wood and wood-based materials

## EDGE COATING

# Instant changeover

## ADVANTAGES

- ✓ Consistency of application
- ✓ No need for specialised labour
- ✓ Use of 100% acrylic UV products, so no solvent emissions into the environment
- ✓ The flexibility to produce "just in time" pieces

## PLUS

- ✓ Quick edge shape changeovers, in just 10/15 seconds.
- ✓ Quick thickness adjustments on the same shape: from 16 mm to 50 mm in just 5/10 seconds.
- ✓ The edge coating process is made automatic and more economical
